

## EXTENDED LOOPS WITH HOOK BRACKETS

North American Headquarters  
GKD Metal Fabrics  
825 Chesapeake Drive  
Cambridge, MD 21613  
Direct: 410.901.8428 or  
410.901.8429  
metalfabrics@gkd-group.com

### DESCRIPTION

Loops are formed from cables that extend beyond the metal fabric and are secured by grommets. A round tensioning bar is fitted through the loops and is hung from hooks at the top of the panel. At the bottom, the bar is placed through eyebolts which are secured to a bracket or fixture. This attachment method is used solely for our Omega metal fabric design.

### METAL FABRICS

Omega 1500, Omega 1510, Omega 1520, Omega 1530, Omega Divergence

### APPLICATIONS

Facades, Parking, Solar Control, Partitions,  
Specialties, Covering, Enclosures, Etched Graphics
